

## **Trainer – kids coding technologies**

### **About CoderDojo Belgium:**

Resulting from a worldwide project, CoderDojo Belgium is a non-profit association that organizes free sessions to teach computer programming to young people from 7 to 18 years old, in a club setting. The Dojos are organized by volunteers and thus allow young people to get interested and to develop their knowledge about new technologies.

You can find more information on our website: <https://www.coderdojobelgium.be>

## **Trainer – Computer science**

We are looking for a person knowledgeable in youth-friendly programming languages such as Scratch, micro:bit, HTML, Python, etc. in order to give animations for children as well as trainings for volunteers participating in the CoderDojo4All project. The CoderDojo4All project aims, through inclusion, to bridge the digital divide and reach young people who do not easily find their way to CoderDojo. We want to offer equal opportunities to all target groups. This project is active throughout Belgium.

### **Job Description:**

- You integrate CoderDojo's priorities and values and translate them into all activities.
- You organize training sessions for employees and volunteers of social organizations who would like to coach children in the CoderDojo4All project.
- You organize introductory sessions on coding for children.
- You organize both face-to-face and online sessions.
- You are available to travel all over Belgium to give these trainings in French or in Dutch.
- You create course materials and presentations
- You lead the organization, follow-up, documentation and evaluation of the sessions
- You update the pedagogical material already developed. You make sure that the educational material is accessible to the whole CoderDojo Belgium community.
- You lead a technology watch (technological evolutions in the sector of computer science education for young people)

### **Your Profile:**

- You are committed to work on an inspired social project: to make young people aware of new technologies and thus contribute to their personal development.
- You have a good knowledge of the subject and an excellent computer and digital culture.
- You can adapt your modules to the audience.
- You have experience in pedagogy, designing and maintaining training materials and workshop organization.
- You are an excellent communicator and organizer.
- You are pragmatic, have a "can do" mentality and can demonstrate the necessary maturity.
- You are flexible, working on different projects gives you satisfaction. You can set the necessary priorities.

- You are fluent in English, French and Dutch and are able to give training in both languages, or you are bilingual English-French or English-Dutch.
- You are willing to travel throughout Belgium for trainings and CoderDojo sessions.

**Our Offer:**

- You will work in a committed and dynamic environment and participate in an ambitious social project.
- You will manage your own agenda to reach your goals, this position requires from time to time to work evenings or weekends.
- The position is open for a permanent position or a freelance consultant.
- Depending on your language skills this can be a full-time or part-time position.

**Are you interested and how do you apply?**

Are you interested in this position or do you know someone who would be perfect for this position? Great!
